

Ogden River Hcz

Recommendations of an Advisory Committee appointed at a meeting held July 13, 1965 at 8:00 P. M. at the Pine View Water System Office, 1483 Wall Avenue, toward the solving of some of the problems concerning Mill Creek.

The following Resolution was adopted by the entire Committee, at a later meeting held July 22, 1965 at 9:00 A. M. at the Pine View Water System Office, 1483 Wall Avenue.

#### RESOLUTION

WHEREAS; Mill Creek has existed for many years serving a vital purpose of Irrigation and other uses.

WHEREAS; Because of development of the affected area and other causes, problems have arisen because of debris and foreign matter entering into the Mill Stream causing flooding, seepage in basements, restriction of water deliveries, as well as pollution and unsightly conditions.

WHEREAS; a meeting was called July 13, 1965 to air these problem and to investigate possible solutions. A committee was appointed as a result of this meeting to make recommendations to those affected for the solution of these problems.

WHEREAS; It is the consensus of this Committee that our function is only advisory and that our efforts as far as this committee is concern is only to make recommendations in the hope of being of service to those directly affected.

NOW THEREFORE, BE IT RESOLVED by said Committee that:

1. An Association be formed representing the various irrigation Companies and other interested parties concerned with Mill Creek.

2. That such an association acquire financial support from those directly concerned to defray the expenses which the association might create in carrying out its duties.

3. That this Association make up its own program of action which might include the following points among others; (a) To initiate cooperation between the City,,County, State Engineer, and the Association in improving channel conditions; (b) To create an atmosphere of improvement through education with regard to individual violators of the Creek as well as those problems concerning all property owners along the stream, spelling out the dangers to them of continued problems; (c) Publicity; (d) Elimination of obstructions; and (e) Recommendation for a city ordinances prohibiting dumping debris in canals and stream channels.

IT IS also the recommendations of this Committee that each irrigation company discuss this situation that exists and the recommendations contained herein and appoint an individual to serve and represent them on such an association which in our opinion should be established. It is the hope of this Committee that such discussion and appointment will take place by each irrigation company by September 1, 1965, such that the various representatives may organize such an Association soon thereafter.
